TESA

ASSA ABLOY

# Safety and security, our main goals.

Worse than being in an emergency situation is to be unprepared to face it. TESA ASSA ABLOY's fire doors locks have been manufactured for maximum resistance in case of arson, and they are an efficient protection against fire: they can be installed in RF doors that prevent the transmission

of smoke and gas, prevent the flames and heat from entering, avoid inflammation on the side of the door that hasn't been exposed to fire... As you see, TESA ASSA ABLOY cares about your safety even in the worst situations.

## Safety and security, our main goals.

One thing is worse than being in an emergency situation: to be unprepared to face it. TESA ASSA ABLOY's firebreak locks have been manufactured for maximum resistance in case of arson, and they are an efficient protection against fire: they can be installed in RF doors that prevent the transmission of smoke and gas, prevent the flames and heat from entering, avoid inflammation on the side of the door that hasn't been exposed to fire... As you see, TESA ASSA ABLOY cares about your safety even in the worst situations.

## In case of fire, nothing must fail

By firebreak fittings we mean all the elements that take place in tests of resistance against fire in doors, such as locks, hinges, door closers, handles, panic bars, etc.

The purpose of these fittings is to keep the door closed in order to avoid transmission of smoke and gas and prevent the flames and heat from entering, therefore avoiding inflammation on the side of the door that hasn't been exposed to fire.

## A wide range

A good reason to choose TESA ASSA ABLOY. From cost-competitive technical products to electromechanical solutions, all in keeping with the latest design trends.

## Total integration

TESA ASSA ABLOY has decided to reinforce the reliability of its products, and to this effect many of them have been EC certified. This guarantees the highest performance and features in TESA ASSA ABLOY's products.

The UNE-EN 12209 standard, updated in 2004, which refers to "Fittings for Buildings – Locks and Bolts", must be complied with when it comes to mechanical locks with strikes that have been installed on doors, windows and entrance doors.

These standards establish a series of tests and requisites for:

- Durability
- Resistance
- Security

## Guaranteed by TESA ASSA ABLOY

Since the company was born in 1941, our whole range has always guaranteed a total commitment to integral quality. Proof of this commitment is the ISO 9001 quality certification (received in 1994) and the ISO 14001 environmental management certification (in 1999), which makes TESA ASSA ABLOY a pioneering company in the industry.

## 2030 Series

- » Sintered steel latch: endures temperatures over 900° C.
- » 8x8 mm follower rod.
- » Distance between each axis: 85 mm.
- » With panic function (always free passage from the inside), except in the 4030E model). In case of simple follower, a protective device for the follower is installed inside to prevent the handle from being activated. In case of double follower rod, the lock is reversible.

## CF-50 Series

- » Lock suitable for use on fire rated doors.
- » Steel latch: working temperature > 900°C.
- » 9x9mm follower.
- » Distance between axes: 72 mm.
- » Backset: 65 mm.
- » Reversible.
- » Zinc plated steel (Z) or stainless steel (I) frontplate.
- » Durability: 200.000 cycles @ 120N pre-load.
- » Additional security features:
  - 1) New deadbolt design (increased stiffness).
  - 2) When cylinder is locked and deadbolts projected the latch remains blocked and it can not be retracted.
  - 3) When cylinder is locked the latch activates a deadlatch system.

## Counter lock CF-32

### Features:

- » Counterlock for double leaf doors, to be installed in passive leaf.
- » It can be installed with CF60 or CF50 on the main leaf.  
CF50 is not valid for panic exit device solution
- » CE certified according to EN1125:2008 (when installed with CF60 on the main leaf).
- » Suitable for FR doors.
- » 72mm distance between axes.
- » Backset: 65mm.
- » Can be operated manually or through the panic bar.
- » When operating the counterlock, the CF32 actuator pushes back the main leaf lock latchbolt and retracts the top and bottom rods at the same time.
- » Complete lock set consists of a central main lock, two vertical rods with bolts and a top relatching device.

CERTIFIED ACCORDING  
**UNE-EN

## Counter lock 2032F

### Features:

- » Counterlock for double leaf doors, to be installed in passive leaf.
- » It can be installed with 2035T, 2037F and 2039T on the main leaf.
- » CE certified according to EN-1125: 2008.
- » Suitable for FR doors. EN 1634-1:2014.
- » 85 mm distance between axes.
- » Backset: 60mm.
- » Stainless Steel made reversible ½ rounded frontplate.
- » Can be operated manually or through the panic bar.
- » When operating the counterlock, the 2032F actuator pushes back the main leaf lock latchbolt and retracts the top and bottom rods at the same time.
- » Complete lock set consists of a central main lock, two vertical rods and a top and bottom locking point.

## CF60 solenoid Series

### Mechanical features

- » CF60 lock, cylinder not included, panic function for all versions
- » Suitable to be used in FR doors
- » Certified according UNE-EN1125:2009
- » Certified according UNE-EN 12209: 2004.
- » Steel latch, suitable to be used in FR doors
- » Non-friction guide between latch and frontplate
- » 9x9 mm follower
- » Backset 65 mm
- » Distance between each axis 72 mm
- » Reversible (non handed)
- » Front plate finish: zinc plated (Z) or stainless steel (I)

### Electrical features

- » Power supply: 12Vdc / 24Vdc
- » Consumption : max 550mA (12Vdc) / 270mA (24Vdc)
- » Consumption: stop 240mA (12Vdc) / 110mA (24Vdc)

Product code	Inner function	Frontplate finish

CF65NPTRSR9ZCER	No Panic	Zinc plated
CF65TRSR9ICEROB	Panic	Stainless steel
CF65TRSR9ZCEROB	Panic	Zinc plated
CF65IRSR9ICEROB	Panic (Inwards opening)	Stainless steel

### CF60 with panic function

#### Performance

- » Locking the cylinder, the external follower of the lock gets blocked and the door can not be opened. However, as it is an panic lock, the door can always be open from inside by activating the lever or the panic exit device.
- » With an electric signal, the electro switch clutches the inner mechanism of the lock allowing the door to be opened from outside operating the lever.
- » When the signal disappears, the lock becomes blocked again from outside.
- » Version "Inwards opening" (CF65IRSR9ICEROB) - only with Stainless Steel frontplate.

#### Certification

- » CE certified according UNE-EN12209 & UNE-EN1125

### CF60 without panic function

#### Performance

- » Locking the cylinder, the lock gets blocked and the door can not be opened, neither from inside nor from outside.
- » With an electric signal, the electro switch clutches the inner mechanism of the lock allowing the door to be opened from inside and outside operating the lever.
- » When the signal disappears, the lock becomes blocked again.

#### Certification

- » CE certified according UNE-EN12209.

### Installation

# Fire doors hardware

## 2UB0F Series

### Features

- » Mortise lock for wooden doors.
- » Conforms to the UNE-EN 12209 standard. EC-certified.
- » Reversible, silent latch in sintered steel. Profile of the latch: 17 mm (extra-security).
- » Distance between centers: 85 mm.
- » Backsets: 60/70 mm.
- » By default, they include a panic exit function allowing for permanent free passage from the inside. With a double follower rod, an external protection device for the rod is installed in order to prevent the handle from being operated.
- » Steel follower rod: 8mm. Deadbolt follower rod: 6 mm
- » Optional round shape 1/2.
- » Closed body, which prevents shavings from entering at the time of installation.
- » TE-5 Europrofile cylinder with nickel steel keys. LP and HL finishes: cylinder's finish in brass. HN, AI and NE finishes: cylinder's finish in nickel.
- » Packaging in boxes of 1/20 units.

Depending on whether it is an entrance door, a passage door or an emergency exit, and also on the dimensions of the lock (distance between each axis of 85 or 72 mm), we will choose the most suitable model of handle or double handle.

\* Stainless steel finish - Flat knob  
Black finish - Ball knob

# Handles for institutional buildings

## Fire doors Series

### Sena Series

Fire rated and flame-resistant doors preserve the airtightness in a room where a fire has occurred, preventing the flames from spreading to other rooms in the building. The fitting (lock, handle, knob, door closer...) plays an important role here, ensuring the door remains completely closed and no heat or inflammable gases enter the room.

This chapter includes stainless steel handles and steel-based handles.

The Sena series has been certified by the LGAI and the EN 1634-1:2000 standard as a firebreak handle (minimum resistance to fire tests with the corresponding door: 120 minutes).

#### Firebreak spindles

In galvanized steel, capable of enduring high temperatures.

#### Steel reduction

Valves in 9 to 8 mm, 8 to 7 mm and 8 to 6 mm for firebreak locks.

#### Fixing of the handle

Depending on each model, fixing is carried out with fixed through bolts on the internal plate, or floating through bolts / bolts straight onto the door's leaf.

In this case you can order floating through bolts that will go through the door making the installation more resistant. Fixing screws will be hidden in order to prevent the handles from being stolen in public buildings.

#### Finishes

- » Stainless steel    AISI 316L
- » Black                Ral 9005

# Handles for institutional buildings

## Fire doors Series

### Monobloc Series

The MONOBLOC Series has been certified by the DIN 18273 standard for fire rated and flame-resistant doors.

#### Handle

Specifically aimed at doors subject to a big strain (hospitals, schools, public buildings).

The internal plate has been fixed to the handle with a black polypropylene coating.

The covers, made of the same material, have been fixed to the internal escutcheon with clips.

Models in which the handle has been attached to the square with a stud bolt (satin black finish) have been certified by the UNE - EN - 1634 - 1: 2000 standard, with a 150 KG. resistance to motion strain and 200,000 actuations.

Specifically designed for locks with DIN sizes (72 mm distance between axis).

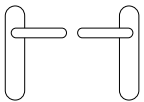

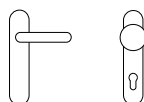

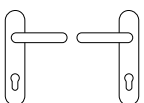

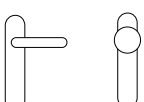

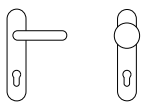

#### Fixing of the handle

Hidden by knurled floating through bolts that go through the door's leaf from the outside.

#### MONOBLOC Series Finishes

The steel-web handle has a black polypropylene coating has a matt black plypro that gives it rigidity and strength, high resistance to solvents, absence of electrostatic charge and stability against light and temperature variations.

# Fire doors hardware

## Security multipoint locks TLPN and TLBA

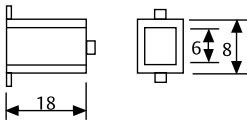

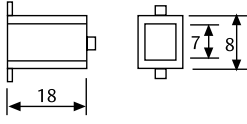

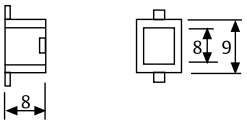

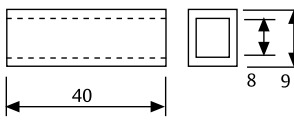

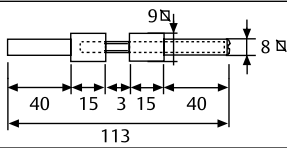

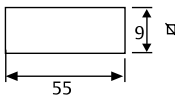

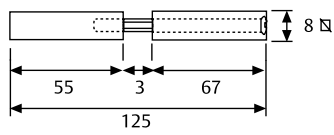

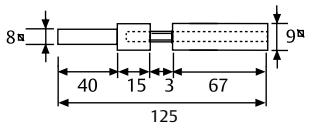

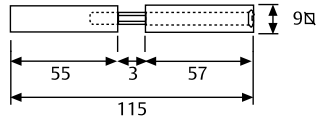

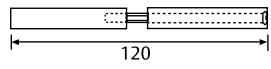

- » Tempered steel levers.
  - » Antilever hooks in auxiliary boxes.
  - » Devices are protected by locked boxes made of galvanized steel.
  - » Highly rigid U-profile steel front. Ideal for RF doors.
  - » Security escutcheons E-700L, E300L, E700 and E800.
- » It can incorporate an embellishment for the key-storing escutcheon.
  - » PATENTED no-return device for bolts and levers.
  - » Long strikes in 40mm standard width with choice options in 35mm and 45mm. Also available in a special height of 2035mm.

## LITE - QUICK - Universal - TOP Series

- » CE market panic exit devices according to UNE-EN 1125.
- » Rim and mortice version available.
- » Single and multipoint locking panic exit devices, depending on door configuration and / or customer requirements.
- » Different outside device configuration available: knob, cylinder, handle...
- » Low projection devices maximizing the free passing area.
- » TESA panic exit devices are available in different finishes including stainless steel (AISI 304).
- » TESA panic exit devices can be combine with electromechanic devices for access control.
- » Refer to panic exit devices chapter for further information.

# Fire doors hardware

## Hinges for certified firebreak doors

- » 3mm thick steel hinge for break doors. Reversible.
- » Nickel-plated finish: shaft and leaf hinge.
- » Finish: without frame hinge treatment, to facilitate the welding process.
- » Spring hinges are supplied with tensioning tool.
