

Characteristics

- Escutcheon: Made of solid, reinforced steel
- Drill-resistant ball inlays at vulnerable drilling points protected with 6 drill resistant balls
- 9 mm thickness cylinder microfusion made tempered protector, to prevent drilling
- Solid Stainless steel made rotating bushing with anti-clamping function
- Double rotating sleeve for enhanced security
- Mounted with four hardened steel screws (2 M6, 2 M5)
- 4 mm thick, steel made interior counterplate
- Screw thread adjustable escutcheon to fit different door thicknesses
- The escutcheon body does not protrude from the bushing, making it easier to machine the door and allowing installation on metal doors
- TESA and DIN type housings (38 mm between centers)
- Compatible with Europrofile and Swiss Profile cylinders
- Finishes: AI (Stainless Steel), LPD (PVD Gold Treatment), NE (Black Painted)
- Personalization options with laser engraving

Code	Finishes
E90026AI	Stainless steel
E90026LPD	Polished brass
E90026NE	Black
